## MODULAR **EXHIBIT** SYSTEMS

Modular exhibit systems and displays provide exhibitors with sophisticated, custom-looking exhibits that stand the test of time, and can adapt and evolve from show to show. Using standardized components as building blocks, modular displays can often be reconfigured to fit multiple size spaces and customized to fit unique needs.

Modular displays are used in tradeshow and events, and are often used as permanent displays in museums and educational environments and in retail settings.

Many of our modular exhibit systems combine aluminum extrusion frames with push-fit fabric graphics. North American-made modular exhibit systems are created by expert welding and metal-working technicians. Graphics are printed with the latest state-of-the-art large format printers, and all graphics are produced and finished by hand by highly-skilled sewers in North America.

Our variety of modular display systems offer displays of many types and sizes, from banners and light boxes to table-top displays, through to 10' and 20' inline exhibit kits, as well as 20' by 20' island exhibit kits. Display accent pieces and accessories such as charging stations, counters, multi-media kiosks, lighting and more help add functionality and the final finishing touches.
